ABOUT ME

I'm a Software Engineering undergraduate at **Daffodil International University**, with a science background from my SSC and HSC. I'm building core CS foundations — data structures, digital logic, linear algebra, and discrete mathematics — while working on independent programming projects in C, and I'm comfortable across the Microsoft Office and Adobe suites. My biggest motivation in my student life is my parents and my closest teachers.

RECOMMENDATIONS

Izaz Ahmed Tuhin Lecturer

I have taught Fuad in Introduction of Software Engineering during his studies at Daffodil International University. He consistently demonstrates strong analytical thinking and a genuine grasp of core programming and problem-solving concepts. He approaches assignments independently and shows real initiative in his coursework. I recommend him for further opportunities in software engineering.
